BENTONVILLE, AR | 240.440.2799 | petersen.brandon@protonmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Product Manager | Tech Enthusiast | Customer Experience Champion | Cross-functional Team Leader

Product Manager with 2+ years of experience shipping AI/ML products with 8+ years leading \$100M+ retail operations. A combination that means I can read a P&L, write SQL queries, and run a sprint review all in the same day. At Sam’s Club, I delivered an AI-powered financial forecasting tool that has generated \$2.4M in value and saved more than 2000 hours annually. Now leading Curbside Personalization for 6M+ members using Claude Code, CodePuppy, and modern AI tooling to turn curbside from a transactional handoff into a relational experience. Currently immersed in reading Unreasonable Hospitality

AREAS OF EXPERTISE

Product Strategy	E2E Product Ownership	0 -> 1 Product Development	Agentic AI Tooling
Agentic PRDs & Prototypes	AI/ML Product Management	Data-Driven Prioritization	KPI Definition & Tracking
Market Analysis	Cross-functional Leadership	Stakeholder Alignment	Enterprise/B2B SaaS
Agile / Scrum / SAFe	P&L Management	Retail & Omni Operations	Change Management

PROFESSIONAL EXPERIENCE

Product Manager II, Personalization, Sam’s Club, Bentonville, AR | Aug 2025 – Current

- Owning member-aware, personalized experiences across the omni-channel curbside experience
- Identified curbside pickup as a missed loyalty touchpoint despite serving 6M+ members. Defined product vision and roadmap, converting pickup from transactional handoff into a relational experience, with a 10-club pilot now underway targeting +2NPS, -5 min perceived wait time, and -15% contact rate
 - Owned the full product development lifecycle across a sub-category, applying structured, data-driven prioritization to sequence work across multiple parallel phases with 6 different teams
 - Conduct market research, retention, and feature-impact analysis to validate strategic bets before committing engineering capacity, and communicate findings clearly to business and technical stakeholders
 - Use Claude Code, CodePuppy, and other agentic AI tools daily to draft PRDs, generate wireframes and high-fidelity prototypes, and run sentiment analysis on member feedback. Compressed discovery-to-spec cycle time and sharpened decision before engineering commitment

Product Manager II, Forecasting & Scenario Modeling, Sam’s Club, Bentonville, AR | July 2024 – Aug 2025

- Led end-to-end delivery of the IBG financial forecasting & planning to a unified AI/ML platform replacing 12+ fragmented systems across a \$1B annual planning footprint
- Shipped the IBG platform in 13 months with a 28-person cross-functional team, consolidating 12+ siloed data sources into a single real-time P&L, ML forecasting, and scenario modeling tool. Achieved 100% org adoption in 6 months
 - Replaced legacy multi-week planning cycles that delayed executive signal response, delivering +30% forecast accuracy and 50% faster planning cycles via real-time ML forecasting, enabling proactive signal-based planning at scale
 - Found the merch finance team capacity consumed by manual Excel-based forecasting workflows, designed automated ML-driven replacements, saving 2000+ hours annually and generating \$2.4M+ in measurable value

- Found external shocks poisoning ML data with non-representative spikes, shipped an anomaly detection and cleansing framework with human-in-the-loop, preventing model drift and improving forecast accuracy and stability by ~5%

Product Manager Intern, Sam's Club, Bentonville, AR | March 2024 - June 2024

Product intern solving automation operations problems in real-time. Converted to full-time PM II upon completion

- Diagnosed and resolved a weight-tolerance mismatch between Packsize automated custom boxes and the WMS (Warehouse Management System), cutting hospital-lane rejections by 75% from 175 to 45 in a single week, then to 5 after resolving an upstream order modification sync issue
- Found CVP auto-pack machines at ORD FC running at 12% utilization due to associate distrust of the automation workflow. Ran a targeted leadership education campaign and direct associate engagement, doubling utilization to 25% in six weeks
- Identified that out-of-sequence boxes would break GreyOrange robot workflows and were already degrading Locus pick paths. Coordinated a cross-system fix between Packsize and the robotics layer to enforce carton sequencing, projecting to reduce pick duration by ~15%

Club Operations Manager, Sam's Club, Frederick, MD | June 2015 - March 2024

Worked various roles from cashier to co-manager. Led daily operations of a \$105M-revenue club across merchandising, fulfillment, fresh, HR, and P&L management

- Owned full P&L for a \$105M revenue club. Built a rigorous sales, expense, and wage budget paired with active store-index and KPI cadence management, driving \$13M comp revenue growth in FY24
- Inherited inconsistent inventory accuracy and elevated shrinkage across the club. Instituted coordinated audit cycles and process discipline spanning merchandising, backroom, frontend, and leadership teams, achieving a 97% inventory accuracy and 11.% shrink reduction
- Recognized inefficient visual-merchandising layouts consuming associate capacity on low-value tasks. Led a 60-person team through a full overhaul, improving operational efficiency by ~20% and freeing capacity for high-value customer-facing work
- Observed inconsistent new-hire onboarding, hurting new-hire and team productivity. Designed a structured training program that reduced onboarding time by ~10% and accelerated time-to-full productivity across the associate base
